Location: San Justo, Santa Fe, Argentina

Frontend developer specialized on high performance UI interfaces using React and Next. I focus on modern designs (Tailwind, ShadCn), and I also use AI to tackle complexities between interfaces and backend logic. I have experience in Fullstack development, which allows me to integrate the interfaces with third party services.

Tech Stack

- Frontend: JavaScript, TypeScript, React, Next, Vue.
- Styling: Tailwind CSS, ShadCn UI, Styled Components, Framer Motion
- Tools: Git, AI (OpenCode, Claude Code, using Agents and Skills).
- Knowledge in: PHP (Laravel), SQL (PostgreSQL, MySQL).

Experience

2025 to 2026 - Commodin (San Justo, Santa Fe, Argentina) - Frontend Developer
(React, Next, TypeScript, Zustand, MQTT, Payment Gateways, Zod, Tailwind, ShadCn, Claude Code)

Implemented a B2B auction car platform. Led a small developers team to migrate legacy code to Next.js. Worked along with the backend team to define REST endpoints and frontend team task delegations.

- Real time interaction: Implemented MQTT for real time high concurrency auctions and real time chat.
- Payments: Integrated Mercado Pago, Paypal and Payway systems on checkout page.
- Complex forms: Made complex and accessible forms using React Hook Form and Zod for robust validations and TypeScript type safety.
- Multiple Theming: Handled global app state using Zustand, tracking multilanguage using I18n, and custom style themes for each client.

2020 to 2025 - Litebox (Buenos Aires, Argentina) - Frontend Engineer
(React, Next, Native, Vue, TypeScript, Strapi, Tailwind, ShadCn, Styled Components, Ant Design, Framer Motion, I18n, JWT, Zod, NestJS, Slack API)

Worked for international clients (USA, GB), delivering high impact web and mobile interfaces on Health, Sport Bets, and AI industries. Did team collaboration with QA and design agencies to guarantee pixel perfect UI.

- Project diversity: Experience in many areas like Rental Car platform using Vue, high traffic Sport Bet platform migrated from a legacy React Native code to React using TypeScript and Styled Components.
- Health Care and CMS: Collaborated and participated in developing USA healthcare platform and I did AI sites using Nextjs, TypeScript, Tailwind CSS, and Strapi as CMS.

- AI and Interactive websites: Made high performance animation pages using Motion for data science companies and worked in AI and slack API development using NestJS for backend.
- Modern Tools: Worked with JWT for login, I18n for translations and ShadCn UI modern and accessible layouts.
- Tech versatility: Built local tools to ease multitenant app testing to facilitate changes between many user credentials and authentication tokens with Vue assisting the QA team.

2017 to 2020 - Crombie (4R Soluciones) (Santa Fe, Argentina) - Fullstack Engineer
(PHP, Laravel, WordPress, MySQL, JavaScript, jQuery, Vue, React, SASS/SCSS, Bootstrap, Foundation CSS, Elementor, Divi, Jira, Git)

Delivered web solutions to news portals and corporate companies. Worked and collaborated with Project Managers and Designers, using tools like Jira for daily workflow Agile and workflow coordination.

- Custom CMS: Built Wordpress theme templates and plugins from scratch using PHP, and tools like Elementor and Divi for marketing websites.
- Fullstack Apps: Developed SPA and complex logic using Laravel and Mysql. Manage the life cycle from database design to UI creation delivered from the design team.
- Advanced styles and Frameworks: Build responsive interfaces and browser compatibility using SASS/SCSS, Bootstrap, and Foundation CSS, adding jQuery and Vue/React to add interactive UI.
- Optimizations: Fixed errors and performance issues, ensuring app stability.

2016 to current - Freelance (San Justo, Santa Fe, Argentina) - Fullstack
(Typescript, Vue, React, Next, Tailwind, Git, Claude AI, OpenCode AI)

Developed many solutions for San Justo city like:

- News portal: Created news portal fast and most visited website with weather, stocks, social sharing and many features. It has a dashboard built in with metrics and stats.
- Pet tracker: Implemented a website to help people upload their lost pet so owners and neighbors could help each other by sharing the search via social networks and achieve direct communication with the pet owner. It has a pre approval dashboard.
- English on demand: Built a website for an English teacher who offers her services worldwide.
- Food Delivery: Developed a food delivery website for a growing local Pizza store who wanted to improve its take aways and requests via Whatsapp messages.

Education

- Tecnicatura Universitaria en Informática Aplicada al Diseño Multimedial y de Sitios Web - Universidad Nacional del Litoral (FICH), Santa Fe, Argentina.
- Carrera de Programación Web - Educación IT, Buenos Aires, Argentina.

Languages

- English - Intermediate (B2) - Professional experience working on international teams.
- Spanish - Native.
